**Practical Application: The School is laid out to be very practical. We want attendees to HEAR - SEE - DO.**

Therefore subjects like the **Queen of Heaven (QOH)** and **Secret Societies** will be taught in a very practical way, with prayer actions during the school times taking place.

During the past years we have noticed that many people have received teaching on Diagnostic Historical Christian Research, but many still lack the experience of HOW to APPLY that research. During this time, we will have many practical workshops during which time we shall do case studies, discuss questions and help you to even start off the research in your area.

There will be a practical session by Amanda Le Roux telling of her experience of practical research and application in the town of Standerton.
