

Subject: Update on Maria: Praise the Lord!

Dear Saints

Three weeks ago we had, for the first time, asked you to pray for Maria Engelbrecht - one of our city's intercessors. She had been diagnosed with an advanced state of leukemia (blood cancer) days before.

A week ago we had reported that Maria had had her first session of chemotherapy, and that the Lord had withheld any hair loss or nausea. Also, that Maria and her husband, Derick, had found a place in the Lord which they had never known before, which caused them to be absolutely jubilant!

Well, the best is still to come! I spoke to Derick this morning. He reported that a blood sample yesterday had shown NO SIGNS of cancer! The cancer is GONE! Praise the LORD!

Maria still needs to stay in hospital - so that her immunity system (which is virtually zero at present) can be strengthened before she would be allowed to go home.

Thanks to everybody who had stood with Derick and Maria in prayer. All praise to God!

In Christ

Eben Swart
